Personal Profile

Enthusiastic and adaptable individual with invaluable skills, proven dependability and a strong desire for continuous learning/growth. Seeking opportunities to contribute and develop my skills and experience towards the success of a dynamic company.

Experience

DATA ANALYST | BANK OF ENGLAND | 2024 - PRESENT

- Gained proficiency with a diverse range of software, including both legacy and modern platforms..
- Supported coding, data cleaning, dashboard development, and process optimisation initiatives.
- Contributed to the publication, creation and maintenance of organisational datasets.
- Participated in projects that enhanced technical skills and improved team efficiency.
- Attended workshops and discussions on artificial intelligence and emerging data trends in the workplace.
- Assisted in the transition to cloud-based data systems, acquiring first-hand experience in modern data storage solutions.
- Engaged in community outreach initiatives, including serving as a panellist for apprentice onboarding and supporting socioeconomic diversity among young people.
- Developed strong professional networks across multiple departments, gaining insight into varied roles and perspectives.
- Embraced constructive feedback and continuous learning to drive personal and professional growth.
- Adapted quickly to new environments, overcoming initial challenges and building confidence in high-performing teams.
- Contributed to workplace initiatives, networks and societies.

Certifications

DATA ANALYST LEVEL 4 | JUSTIT | 2024 - PRESENT

- Applied data protection, GDPR, and organisational security policies in all data handling.
- Designed and maintained databases; used SQL, Python, and Tableau for analysis and reporting.
- Automated data processes and created dashboards for clear, user-focused insights.
- Used statistical and predictive methods (regression, ARIMA) to analyse and forecast trends.
- Communicated complex findings to stakeholders with effective visuals and reports.
- Demonstrated initiative, problem-solving, and adaptability across multiple projects.

DATA SKILLS ACCELERATOR | OCT 2023 - DEC 2023 | FAST FUTURES POWERED BY SHELL

- Covered key areas such as data analysis, cleansing, merging datasets, using DAX and Excel formulas, exploratory data analysis, and data visualisation.
- Prepared for the Microsoft Power BI exam (PL-300) and gained insights into the energy transition sector.

UNDERSTANDING CODING LEVEL 2 | OCT 2023 - NOV 2023 | LEARNING CURVE GROUP

- Gained a comprehensive introduction to coding principles, terminology, design, processes, and communication/project management within the digital landscape.

CHEMISTRY LEVEL 4 | 2020-2022 | UNIVERSITY OF KENT

- Developed computer skills for data analysis, simulations, and visualising chemical structures.
- Detail-oriented with experience in solving practical and theoretical mathematical problems. Strengthened problem-solving abilities through complex problem identification and solution formulation.
- Exceptional time management skills honed through managing schoolwork, research, and extracurricular activities in a challenging curriculum.

Skills & Abilities

- Excellent communication and interpersonal skills.
- Introductory skills in Python, R, QL, Power BI, Tableau

- Proficient in Microsoft Office and other key computer applications.
- Strong attention to detail and accuracy.
- Effective time management and organisational abilities.
- Ability to work independently or as part of a team.
- Problem-solving and decision-making skills.
- Competent in risk assessment.
