

FOLASHAYO ODUMOSU

Data Analyst | BI & Visualisation | SQL · Python · Power BI · Tableau
London SE6 · +44 7931 600931 · folashayoodumosu@gmail.com · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Commercially focused Data Analyst with over two years of experience at the Bank of England, delivering comprehensive analytics solutions on large-scale datasets (10,000+ records). With a knack for turning complex data into actionable business insights through interactive dashboards, automated pipelines, and statistical modeling. Skilled in communicating with stakeholders, ensuring data governance, and enhancing operational efficiency. Currently pursuing analyst and BI roles where I can help shape strategic decisions with data-driven insights.

PROFESSIONAL EXPERIENCE

Data Analyst | Bank of England *2024 – Present*

Data Analytics & Reporting · Business Intelligence · Stakeholder Engagement

- Owned end-to-end delivery of a Power BI executive dashboard used by senior leadership to monitor departmental incidents, with drill-down capability for added detail
- Engineered and maintained automated data pipelines using Python and SQL, reducing manual data preparation time by ~25% and improving analyst capacity for higher-value work.
- Designed and deployed interactive Tableau and Power BI dashboards that are used by cross-functional stakeholders to track operational KPIs and key datasets in real time.
- Cleaned, validated and transformed datasets of 10k+ records using SQL, Python (Pandas, NumPy) and Excel, significantly improving the accuracy and reliability of internal reporting outputs.
- Conducted exploratory data analysis (EDA) to surface trends, anomalies and data quality issues, feeding findings back into governance and reporting frameworks.
- Translated analytical outputs into clear data stories, crafting visualisations and presentations for both technical and non-technical audiences.
- Supported cloud migration initiatives, gaining hands-on experience with modern cloud-based data infrastructure and storage workflows.
- Championed socioeconomic diversity by co-leading onboarding events and outreach programmes within the organisation.

EDUCATION & CERTIFICATIONS

Data Analyst Apprenticeship — Level 4 (Distinction) | Just IT *Aug 2024 – Jan 2026*

- Applied SQL, Python and Power BI to produce analytics dashboards and data-driven reports with actionable business insights.
- Designed and maintained relational databases; applied GDPR compliance and data governance best practices throughout.
- Implemented statistical analysis and forecasting techniques including regression modelling and ARIMA time-series forecasting.
- Built automated reporting pipelines and self-service BI dashboards to democratise data access for non-technical stakeholders.

Data Skills Accelerator | Fast Futures (Powered by Shell) *Oct – Dec 2023*

- Completed intensive programme in data wrangling, EDA and data visualisation using Excel, DAX and Power BI.
- Developed domain knowledge in energy transition datasets and sector-specific analytics.

Understanding Coding — Level 2 | Learning Curve Group *Oct – Nov 2023*

Chemistry — Level 5 Equivalent | University of Kent *2020 – 2022*

- Developed strong analytical and quantitative problem-solving skills through computational modelling and laboratory research.

TECHNICAL SKILLS

Data Analysis & Engineering: SQL (advanced), Python (Pandas, NumPy), R, DAX, Excel (advanced formulas, pivot tables, Power Query)

Business Intelligence & Visualisation: Power BI, Tableau, Excel dashboards

Statistical & Analytical Methods: Exploratory data analysis (EDA), regression modelling, ARIMA forecasting, data quality assurance

Data Governance & Compliance: GDPR, relational database design, data lifecycle management, organisational data governance standards

Cloud & Infrastructure: Cloud-based data storage (in-progress), data pipeline automation, version control (GitHub)

Soft Skills: Stakeholder communication, data storytelling, cross-functional collaboration, presenting

PROJECTS & CONTINUOUS DEVELOPMENT

- Building a personal data portfolio (GitHub Pages) showcasing end-to-end analytics projects including EDA, dashboards and forecasting models.
- Active GitHub repository featuring projects in SQL, Python data analysis, Power BI visualisation, statistical modelling and Machine Learning.
- Regular attendee of data, AI and analytics learning events. Aiming to stay current with emerging tools, LLM integrations and industry best practices.
